

exercise 7

1) Complete the HTML and CSS tutorials

<https://www.w3schools.com/html/default.asp>

<https://www.w3schools.com/css/default.asp> so

that you have become acquainted with some structuring and formatting elements. (The goal is a basic understanding of the connections)

2) Produce a pure HTML document that is at least

- Uses 10 different HTML structure and content elements Try out some design elements (coloring, font selection, etc.) that it would actually be better not to combine with the content.

3) Dress the display elements in style rules and finally separate your document into individual files with HTML content part and CSS style description. You can also make further display modifications here

4)(Optional) Serve your work product using the Flask Development Server running in a Docker container.
